

Start with CPM Express. Then Build.

Why collect more disconnected solutions when you can **build onto the platform you already have**? CPM Express (CPMx) gets your business up and running in 8-12 weeks with prebuilt accelerators for close, consolidation, reporting, and planning; and **that's just the beginning**. Built on OneStream's award-winning platform, you can easily extend deeper into financial and workforce planning, AI-powered forecasting, and a wider breadth of SensibleAI agents designed especially for finance.

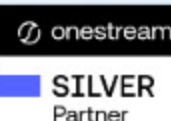

CPM Express
Prebuilt Close, Consolidation,
Reporting, and Planning Capabilities

Financial Planning Express
Deeper FP&A-focused Reporting,
Scenario/Driver Planning, and Templates

**Line Item Modeling +
Workforce Planning Express**
Granular Workforce Planning and Management
Built on Top of Our Line Item Modeling solution

SensibleAI Forecast Express
Machine-Learning Predictions
Designed to Enhance Forecasting

SensibleAI Agents
AI That Asks, Analyzes,
Explains Your Financial Information

CPM Express

**Close + Consolidation +
Reporting + Planning**

A preconfigured path to expedite time-to-value without the heavy lift or cost of a traditional CPM implementation, and retains the scalability of the full platform.

Financial Planning Express

**Expand and Accelerate FP&A
without starting from scratch**

Sophisticated driver/scenario-based planning, forecasting, and deeper analysis are available with planning-specific templates derived from proven industry and implementation methods.

Workforce Planning Express

**Headcount + Compensation +
Workforce Drivers**

Dive deeper into Line Item Modeling for operational planning by expanding calculations, reports, and configurations specific to workforce planning without requiring additional design costs.

SensibleAI Forecast Express

**Predictive / ML that enhances
forecasting accuracy**

Leverage AI and machine learning to generate more accurate forecasts through widened modeling capabilities and analysis directly within the OneStream platform.

SensibleAI Agents

Financial analysis and agentic workflows in natural language

Get answers, insights and actions with financially intelligent AI agents that work on your governed OneStream data.
